Pankaj Suthar

Full Stack Developer

Ahmedabad, Gujarat | +91-7023285164 | sutharpankaj723@gmail.com

Professional Summary

Full Stack Developer with 2+ years of experience building and maintaining web applications across frontend and backend development. Strong expertise in React.js, Next.js, Node.js, NestJS, PostgreSQL, JavaScript, HTML, and CSS. Experienced in developing responsive user interfaces, reusable components, REST APIs, backend services, database integrations, and production web applications. Familiar with Docker, Nginx, AWS, Git, and GitHub, with a strong focus on clean code, problem solving, collaboration, and timely delivery.

Technical Skills

Frontend: React.js, Next.js, JavaScript, CSS3, HTML5
Backend: Node.js, Express.js, NestJS, REST APIs
Database: PostgreSQL, MongoDB, MySQL
DevOps & Cloud: Docker, Nginx, AWS, Application Deployment
Tools: Git, GitHub, Gitlab

Experience

VAXA INFOTECH May 2024 – Present
Full Stack Developer *Ahmedabad, Gujarat*

- Contribute to the development and maintenance of a live web application, working across frontend and backend development tasks.
- Develop responsive and user-friendly web interfaces using HTML, CSS, JavaScript, React.js, and Next.js.
- Build reusable React.js components and Next.js application features following maintainable frontend development practices.
- Develop backend functionality and REST APIs using Node.js and NestJS to support application requirements.
- Integrate frontend applications with backend APIs and database services to deliver complete web application functionality.
- Work with PostgreSQL for application data management, database queries, data integration, and backend operations.
- Use Docker and Nginx for application deployment, server configuration, and application environment management.
- Work with AWS-based infrastructure and deployment workflows for web application hosting and delivery.
- Debug application issues, implement new features, and collaborate with team members to deliver development tasks within project timelines.

Freelance Jun 2026 – Present
Full Stack Developer *Remote*

- Design, develop, and deploy full stack web applications independently for clients using React.js, Next.js, Node.js, and NestJS.
- Build and integrate REST APIs with PostgreSQL and MongoDB databases to deliver end-to-end application functionality.
- Handle complete project lifecycle including requirement gathering, development, deployment, and client communication.
- Deploy applications using Docker, Nginx, and AWS, ensuring reliable and scalable hosting environments.

Projects

Full Stack Web Application Development

- Built and maintained a live web application by implementing frontend interfaces, backend functionality, API integrations, and database-related features.
- Worked across React.js, Next.js, Node.js, NestJS, PostgreSQL, Docker, Nginx, and AWS as part of application development and deployment.
